

The Engineer Factory

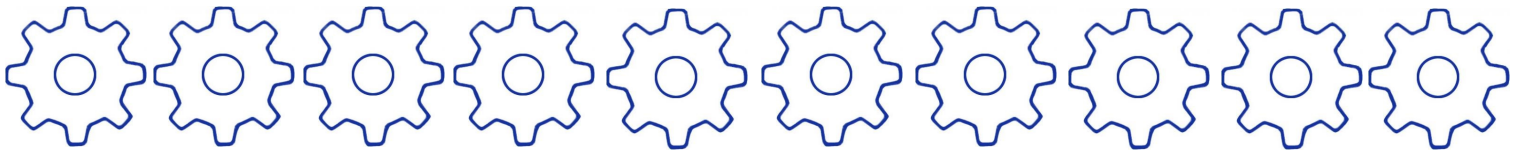

October 28, 2017
9am—12pm
Santa Clarita Service Center

Electricity and art collide in this build with The Engineer Factory!
Build, test, experiment, and solve problems like an engineer.
Learn about light-emitting diodes (LEDs) and use them
to design your own postcard that lights up!

This is a great introduction to Engineering
and a jumping off point for anyone planning on completing
our new “Think Like an Engineer” Journey.
